

Lean Execution

The Workshop

A day and a half immersion into the most powerful process for improving quality, cost, and delivery with a hands-on simulation to illustrate and instill the key concepts.

Who Should Attend

- Operations Management
(VPs of Manufacturing, Plant Managers, Business Unit Leaders)
- Operations and Continuous Improvement Staff
(C.I. Managers, Engineers, Quality Managers)

Key Learning Principles

- Basics of Lean (Stability, J.I.T. concepts, Autonomation)
- How to convert your operation from batch to flow
- 5S principles of workplace organization
- Cascade the “wildly important” goals
- Selection process for Lean projects that support your goals

Schedule

Arlington, TX March 11-12, 2010

Pricing

- Individual: \$850.00
- Lodging and Transportation not included

To achieve goals you have never achieved before, you must do things you've never done before.

Lean Execution
