

LEAN WORKSHOP

“To achieve goals you have never achieved before, you must do things you’ve never done before.”

Key Learning Principles

- › Basics of LEAN
(Stability, Just-in-Time Concepts, 5S Principles)
- › How to convert your operation from “batch” to “flow”
- › How to pull products or services through your value stream
- › What cultural issues to expect in the LEAN journey
- › What results are possible with these principles

Who Should Attend

- › Operations Management
- › Supply Chain Leaders
- › Executives
- › Engineers
- › Quality Managers
- › Continuous Improvement Staff

What to Expect

A day and a half immersion into the most powerful process for improving quality, cost and delivery with a hands-on simulation to illustrate and instill the key concepts of LEAN.
